actual condition of the product ISO 14001 the universal reference Our environmental approach is based on clear rules, which involves the progressive certification of our sites. Quality requirements 3 quality labels. In 2023 we were carefully assessed Our Product Care service centre is the after-sales service for mobility, with the mission of maintaining, repairing and extending the life of mobile devices, phones, tablets and laptops. Product Care has been awarded the QualiRpar label. Our Econocom Factory refurbishment activity with the SMAAART brand has also obtained this label, as well as QualiCert certification , which validates the quality of the operations carried out. Customers can be reassured by the reliability of refurbished products. We know that this certification is re-examined every 3 years, so it obliges us to keep up our efforts. We did just this with the RecQ label obtained this year (the first European quality label for second-hand products) based on the extent to which our efforts meet the requirements of the benchmark system, co-constructed by the digital sector. Ensuring proper care The QualiRpar label brings together public regulators, the repair industry and the eco-organisations Ecologic and Ecosystem in an approach based on 7 criteria customer information and awareness the repairer's expertise the customer and repairer journey checks and improvements waste management trainingqualification of the repairer the repairer's organisation An audit is carried out by an independent certification body. The label is awarded for 3 years, with a follow-up audit after 18 months. "Obtaining the QualiRpar label by the Product Care service centre rewards the professionalism of our teams and guarantees our customers that their employees' mobile hardware will be taken care of in an efficient, transparent and eco-responsible way," emphasises Philippe Goullioud, President of the Econocom Group's Products Solutions business. Professional refurbishing The QUALICERT service certification, delivered by SGS, recognizes service quality commitments based on a sector-specific framework. At Econocom Factory, refurbishment operations are aligned with the Procedures for the Preparation for Reuse of Electrical, Electronic and IT Equipment framework. It covers operator training, product transparency, traceability, and clear warranty conditions. Informing the general public The RecQ label is supported by DEKRA Certification. It ensures specific quality criteria for used products refurbished and provides consumers with clear information on the actual condition of the product, its components, accessories, warranties and associated after-sales services. Obtaining the RecQ refurbishing Label means Identifying the quality of refurbished products according to a recognised standard Providing information on the eco-responsibility of products on the market Removing doubts about the quality of data erasure ISO 14001 the universal reference We work within the clearest of rules, which is why we use labels and standards. The most universal reference is the ISO standard. Today, 23,000 ISO standards are followed worldwide, in all sectors of activity. ISO is the acronym for the International Organization for Standardization, which brings together expert bodies from around 140 countries. ISO standards define the optimum method for managing a production or service process, using guidelines for actions which produce concrete, measurable results. ISO 14001 is the standard for good environmental practice in the design and use of buildings for business activities. 3 pivots An in-depth environmental analysis of the areas and activities to identify their regulatory requirements and impacts. Compliance with the applicable regulatory tools is a prerequisite, but a policy of continuous

performance improvement and prevention of negative effects is also necessary. A regular review of practices and resources is considered essential in order to achieve this. We started the effort in 2022. Econocom Factory was awarded ISO 14001 certification . In 2024, well complete certification of the French sites at Puteaux, Le Plessis-Robinson, Mrignac, Paray-Meslay, Villeurbanne, Toulouse, Labge, Linas. Zaventem in Belgium has been certified beginning of 2024. Each step brings us closer to our goal.
